Construction & Demolition Debris Recycling Statement (DRS)

Complete this form for all construction, demolition and/or renovation projects that meet one of the following: 1) newly constructed residential building; or 2) increase the building's conditioned area, volume, or size; or 3) have a project valuation of \$50,000 or more. Please note that building permits will not be issued without a completed and signed DRS. A separate DRS is required for each building permit. Prior to the start of construction/demolition, submit a completed Drop Box/Dumpster Application. Please call (510) 420-3050 or visit the City's website, www.Piedmont.WasteTracking.com for additional information.

Project Valuation \$ _____

Project Type: Demolition Construction

Project Description: _____

Exclusive debris hauling by Franchised Hauler. The City Council has authorized a single franchised waste hauler, Richmond Sanitary Service, Inc. (dba Republic Services), to provide debris boxes within the City limits. Contractors, of any other paid hauler other than Richmond Sanitary Services may not remove debris for homeowners.

Do not place non-recyclable material in C&D recycling Drop Box! Please note that if the drop box intended for the collection of mixed recyclable debris is contaminated with debris that is not recyclable, the contents of the box will be treated as waste (non-recyclable material) and taken to the landfill. As a result, you may fail to meet the requirements of the C&D Ordinance.

Verification of Compliance. Verification by Richmond Sanitary Service that the debris box was used exclusively for the purpose of collecting only materials on the List of Eligible Materials for C&D Recycling is required. When the project is completed and prior to final inspection, the Applicant shall submit collection receipt(s) to Piedmont.WasteTracking.com for verification by the Building Official. Applicants that have salvaged or reused debris in order to comply with the 65% diversion goal are required to submit a Salvaged Materials Form (SMF).

I believe it is infeasible to recycle, reuse or salvage at least 65% of the debris generated by my project and would like to apply for an Infeasibility Exemption. I have attached a detailed letter that estimates the amount of debris from my project and states the reason(s) that I believe make my project uniquely unable to comply. My letter includes the project's maximum feasible diversion rate, a list of each material the project will generate and the material's estimated weight, and the maximum rate of diversion for that material.

The City of Piedmont C&D Recycling Ordinance requires at least 65% diversion from the landfill of job-site waste materials. I understand that I am bound to comply with the requirements of this Ordinance and will present all required documents related to this project for review. I further understand that if I do not meet the requirements of this ordinance, I could be subject to penalties as listed in Article II of Chapter 1 of the Piedmont Municipal Code.
